*CimTel Customers, are you ready
to easily connect to
blazing-fast, secure Wi-Fi?*

Scan to enjoy protected, high-speed internet
when in range of CimTel's community-wide
SmartTown Wi-Fi network.

FAQ

Is this Public Wi-Fi?

CimTel is providing a secure community Wi-Fi service, but it is not an open network. To ensure users on CimTel's network are safe, connecting to it requires an authentication process. This process ensures your data is encrypted and your information is protected when using the CimTel SmartTown network.

Is it going to take long to complete the authentication process?

No, it is a simple 4 step process that should take about a minute. We won't ask for personal information or a payment card.

Will I have to log-in every time I use SmartTown Wi-Fi?

No, once you install Passpoint you will automatically connect to the hotspots that are part of your SmartTown community.
